Vaxicheck
Free app for iPhone and Android

Vaccination check by photo

With the free app, vaccination entries are recognised quickly by photo and displayed in a clear structure.

Current recommendations
Compared with current recommendations such as those of the STIKO – you see straight away which vaccinations are missing or due for a booster.

PDF export
All vaccinations as a PDF, e.g. for your GP or a trip.

Data minimisation
Usable without entering your name, no tracking tools, GDPR-compliant, all data can be deleted at any time.

For the whole family
Multiple profiles, optional app lock, push reminders for vaccinations, available in 43 languages.
